| Size:            | 70+ Trucks  |
| PDI Solution(s): | PDI AvPac, AvFleetMarshall, AvManager, AvSchedule |

Quantifiable  
decrease in  
maintenance  
costs for BAFS

### Business Challenges

- Needed a significant modernization of equipment to manage the volume of fuel in the hydrant pipeline network
- Wanted a solution to provide clear scheduling for fueling vehicles, interface with a flight information delivery system (FIDS), and handle fuel supply, contract creation and allocation of flights to fuel suppliers

BAFS increased fleet visibility across multiple airports.

## Customer Results

Increased system stability

Reduced maintenance and support costs

Enhanced fleet reliability

Improved company bottom line

“

BAFS experienced clear improvements to the visibility and efficiency of their 24-hour fueling fleet.
