Carrier Exchange

Third-party carrier integration

You don't have to own a delivery fleet to manage one like you do. Carrier exchange gives you tools to manage multiple 3PL (third-party logistics) carriers, monitor progress, and track performance.

Empower your order desk with tools that activate efficiencies in order assignment, delivery tracking, and payment processing. Achieve critical insights into 3PL performance, so you can make the best decisions for your business.

Order Assignment

Carrier Monitoring

Payment Processing

Manage 3PLs like you own them

> Monitor delivery status in real time
> Build a foundation for 3PL performance analysis
> Introduce meaningful efficiency improvements
> Support will-call sites, inventory-managed sites, and bulk plants
> Improve accuracy with SmartReplenish integration
