

# PDI Offset Emissions Program – Fleet

Reduce fleet emissions with turnkey sustainability today

Net Zero is the goal, but the transportation industry represents one of the greatest roadblocks. Driving the largest share of greenhouse gas emissions makes this industry a target for government and regulatory bodies, private-company RFPs, and consumers, all of whom are watching carbon emissions with increasing scrutiny.

Maintain your environmental edge, meeting the needs of shareholders and enhancing your company’s reputation as a responsible partner.

With the Offset Emissions Program – Fleet, PDI helps you evaluate your business activity to measure your fleet’s carbon footprint, to quantify your impact as well as what it takes to offset that impact. PDI works with you to develop an offsetting strategy that is cost-effective and easy to implement.

Turnkey Sustainability

Enhanced Loyalty and Brand Affinity

Scalable with Your Business

Multiple ERP Integration Options

Offset fleet emissions through certified carbon reduction projects, creating positive impact locally and around the globe
