PDI Warehouse Mobility

Streamline your warehouse inventory operations

Manually tracking your warehouse inventory is labor intensive and error prone. Likewise, if you have multiple inventory systems that don't communicate with each other, it's time consuming to keep the systems in sync.

Centralized inventory data, tracked on the spot

Using PDI Warehouse Mobility with PDI Warehouse Inventory gives your employees mobile access to consolidated inventory data for picking, receiving, inventory counts, and product inquiries.

Picking and Shipping
Sales Orders

Receiving
Purchase Orders

Inventory Counts
and Adjustments

Product
Inquiries

Give your warehouse employees instant access to the latest inventory data.
