

PDI Hauler Payment Systems (HPS)

Simplifying freight cost calculations

In a fast-paced world, you need to make strategic decisions for your company to stand out from the rest. Fuel logistics is no exception. PDI offers tools and data to support better decisions to optimize resources.

Smarter calculations for smart business

Hauler Payment System provides your business with a baseline for carrier compensation calculations, anticipating variables and resources affecting all stages of a trip.

Spend less time estimating hauler payments, and make confident decisions backed up by reliable information.

Effective Reporting

Transparent Payment Calculations

Automation Efficiencies

Reduced Payment Processing Overhead

HPS applies simplicity and automation to carrier compensation calculations, supporting your freight cost related decisions

Ensure accuracy; using HPS carriers cross-check the compensation they are receiving from your company

Streamlined processing with predefined scenarios

- Flexibility by considering different vehicle types for trip cost calculation
- Enhanced compensation related calculations using formulas or fixed values
- Reduced entry of manual data by using templates (scenarios)
- Adaptability by calculating costs per KM or H depending on configurations

Take control of your freight costs

- Simplified calculations using preset parameters
- Minimize human error with automated calculations of freight related costs
- Get insights on the carrier payments calculations with reporting tools

Adaptable scenario-specific templates

Simplified compensation formula

Enhanced revenue function matrices
