Protect Your Business with PDI Security Solutions

The safety of your data, systems, and customers is essential to a successful business. But with the rising threat of cyberattacks, you now face greater security challenges on a daily basis. Unfortunately, your risk factor continues to grow as your business relies on more Internet-connected devices and cloud-based applications.

At PDI, we don't think you should have to be a cybersecurity expert just to keep your business running. We've built a team of highly trained professionals to take the IT security burden off your plate.

With a comprehensive suite of fully managed cybersecurity and network security services, you can get the cost-effective protection you need for even the most highly distributed environments.

Cybersecurity Solutions

- PDI Managed Detection and Response (MDR) Essential
- PDI Extended Detection and Response (XDR) Complete

Network Management Solutions

- PDI Firewall as a Service
- PDI Switching as a Service
- PDI Wi-Fi as a Service
- PDI 5G as a Service

PDI Security Solutions are ideal for:

**Convenience
stores**

**Retail
environments**

**Restaurants and
hospitality**

**Financial
institutions**

Robust Cybersecurity Solutions

As fully managed services, PDI cybersecurity solutions are purpose-built to reduce both complexity and management workload. In fact, our security experts have extensive experience helping multi-site operators, convenience store retailers, and small to medium-sized businesses connect, secure, and monitor critical data and assets.

Safeguarding your IT environment against a wide range of cyberthreats—including ransomware—gives you the peace of mind that your business is secure, agile, and compliant across all locations and applications.

Moreover, prioritizing threat detection and prevention with 24/7/365 monitoring and response to real-time threats can help you avoid business disruption while delivering the best experience for your customers.

➤ Fully managed solutions help you avoid the expense of purchasing and maintaining multiple security tools.

PDI protects your critical data and assets by:

- Monitoring a wide range of threats
- Identifying anomalies
- Initiating targeted responses
- Providing simple, secure system protection
- Delivering 24/7/365 US-based support

Guard against Cyberthreats and Disruption

Cyberattacks can be damaging well beyond an initial breach—negatively affecting your business and your brand reputation. With the continued growth in ransomware and other threats, you simply can't leave security up to chance.

If you're not adequately prepared for these threats, the potential impact can be devastating. That's why PDI Managed Detection and Response (MDR) and Extended Detection and Response (XDR) services are designed to solve your fundamental cybersecurity challenges.

Both of these fully managed services are provided around the clock by PDI security experts. We monitor your sites directly from the PDI Security Operations Center (SOC), keeping 24/7/365 vigilant watch to secure and protect your business. The SOC features:

- Highly trained professionals
- 24/7/365 monitoring
- Real-time incident response

➤ **End-to-end protection designed to keep your business online, productive, and profitable**

PDI Cybersecurity Solutions

MDR Essential

- Managed next-generation anti-virus/anti-malware tools
- Managed threat intelligence
- Endpoint detection
- Limited incident response

XDR Complete

- Managed next-generation anti-virus/anti-malware tools
- Managed threat intelligence
- Endpoint detection
- Incident response
- File integrity monitoring
- Proactive threat hunting
- SaaS threat monitoring (cloud IaaS and PaaS)
- Choice of log data retention options

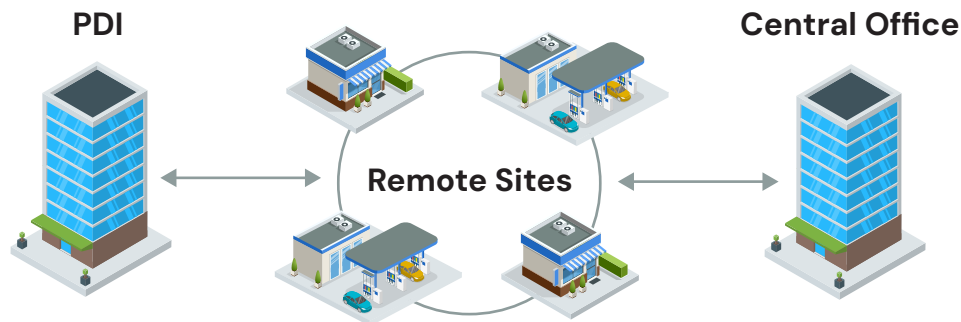

Fully Managed Network Security Services

As market dynamics fluctuate and IT systems become more complex, it's increasingly difficult to keep your networks both secure and compliant. Regain control over your network environment with a cloud-based platform that consolidates network and firewall services—and supports a variety of connectivity options.

To provide you with greater agility and financial flexibility, PDI network security services are available as subscription-based service offerings. Tap into decades of industry experience and technical expertise while modernizing your network to give your employees and customers the best connectivity experience possible.

PDI Virtual Network Operations Center (VNOC)

PDI experts and your team can virtually manage remote site networks from anywhere

➤ Reduce complexity, save money, and avoid business disruption

Secure your sites

Scale your network

Upgrade to 5G primary Internet

Elevate Your Wi-Fi experience

Simplify Your Network and Modernize Your Business

Through fully managed services, PDI can centrally monitor all your remote site networks through a single cloud-based platform. This proactive approach makes it easier to troubleshoot, quickly deploy new services, and avoid costly IT site visits.

Available in an affordable monthly subscription, these services provide a complete network security and connectivity solution:

- Faster deployment
- High performance and reliability
- Simplified operations
- Reduced workloads
- Cost savings

PDI Network Security Services

PDI Firewall as a Service

Improve security and simplify PCI compliance while reducing device footprint at your sites through cloud-based firewall management.

PDI Switching as a Service

Quickly grow your business by scaling up your network to support more devices without introducing management complexity.

PDI 5G as a Service

Cut the cord and upgrade your network with a high-performance primary Internet alternative that boosts reliability and performance.

PDI Wi-Fi as a Service

Give your guests and your employees the wireless Internet experience they deserve with a modern, scalable connectivity solution.

➤ Protect your data, payment transactions, customers, and business with best-in-class network security services.

Collaborate with Security Experts You Can Trust

A healthy business requires a holistic strategy to secure your data, applications, and locations—you can trust our team to get the job done right the first time. When you work with PDI, you immediately gain access to:

- Decades of experience
- Highly trained experts
- Best-in-class tools and resources

Our award-winning threat detection and security services are used by businesses around the globe that face the same complex challenges as you. Likewise, we can manage your IT security complexity, keeping your systems well protected against vulnerabilities and ready for whatever comes next.

In turn, you can achieve the security goals for your business, knowing that your business is well protected.
