

# Manage Inventory More Efficiently

## PDI Planning

Maximize efficiency and reduce retains, split loads, and run-outs with a powerful forecasting solution.

PDI Planning gives fuel retailers and wholesalers the real-time visibility they need to manage inventory, forecast delivery projections, and plan orders. Forecast optimal loads and pinpoint delivery window times to maximize the number of gallons for each load, reduce split loads, and eliminate preventable run-outs.

Forecast Optimal Loads

Improve Efficiency

Gain Real-Time Visibility

Lower Supply Costs

“PDI Planning provides us with the tools we need to manage our fuel operations effectively and to develop strong relationships with our preferred suppliers.”

– Marc Althen, Senior Vice President,  
Penske Truck Leasing

## Key Benefits at a Glance

- Optimize inventory with sizeable reductions in excess in-ground inventory
- Improve delivery forecasting abilities with fewer run-outs, diversions, and split loads
- Lower overall supply costs by buying the right amount of fuel from the right place at the right time
- Increase average load sizes and lower transportation costs
- Improve carrier management results with fewer mistakes and improved carrier charge backs
- Get more efficient dispatching results with increased dispatcher productivity

## Gain a competitive advantage

- Automate data collection to support a variety of tank gauge and accounting system processes.
- Use profile sourcing, delivery, and ordering information for each site.
- Manage communication and orders for both internal fleets and outside fuel carriers.
- Monitor current and historical inventory data, exceptions, and carrier inventory management performance.
- Measure business performance with analysis of inventory levels, scheduled orders, average load sizes, and split/retain activity.
- Ensure pricing integrity throughout the quote to cash lifecycle with branded, configurable electronic delivery tickets with the option to include BOL images.

# Streamline Scheduling and Dispatching

## PDI Dispatch

Improve efficiency, visibility, and decision making with a solution that gives you real-time visibility into critical fuel operations.

PDI Dispatch is an enterprise-level fuel logistics solution connecting fuel retailers, wholesalers, and carriers. With better visibility into the availability of drivers and vehicles and real-time delivery status updates from the field, scheduling is easier, productivity increases, and your operating costs go down.

Easier Scheduling

Increased Productivity

Better Visibility

Responsive Customer Service

“When you sign up with PDI, you truly have a partner in the business. They really put the best interests of the customer first.”

– Keith Slater, CFO, MAPCO Express, Inc.

## Key Benefits at a Glance

- › Schedule transportation resources in less time, with fewer mistakes
- › Optimize use of both internal and external transportation resources in order to lower costs
- › Improve response time to unplanned driver or truck events
- › Increase dispatcher productivity
- › Leverage in-truck integration for real-time delivery updates

## Gain a competitive advantage

- › Manage transport and short truck workflows in one system.
- › Balance work across all internal and external resources with a solution that lets dispatchers schedule fuel orders across multiple dispatch markets, hand off overflow orders to outside carriers, and transfer orders to other dispatch markets.
- › Optimize all resources with calendar-based schedules for easy planning of driver work schedules and routine truck maintenance.
- › Schedule work faster and with fewer errors with fuel orders that are organized by priority.
- › Reduce dispatch costs by pairing with our in-truck mobility solution to get real-time communication between drivers and dispatchers and real-time load closure.
